Superior quality up & over garage doors for every home

Garador's up & over garage doors are available in an extensive range of sizes that includes singles, doubles and made-to-measure. You can choose from two types of lifting gear to operate your garage door: canopy or retractable. Please see overleaf for further details.

Three different materials are on offer to suit your garage's individual requirements, these are: steel, timber or grp (glass reinforced polyester). Each material comes in a variety of designs and colours to suit.

All Garador up & over garage doors come with a Limited 10 Year Warranty

Canopy lifting gear

An up & over garage door with canopy lifting gear requires less space for opening, as there are no tracks running back into the garage. It is available in single door sizes up to 3049 mm wide and one-third of the door protrudes from the garage whilst in the open position.

1 Two-point locking for security

2 Zinc coated torsion spring

3 Durable steel cables & cast alloy drum

4 Guide rail & anti-drop safety mechanism

If you are looking to automate your garage door with an electric operator, we recommend retractable lifting gear as it is ideally suited to electric automation.

Retractable lifting gear

An up & over garage door with retractable lifting gear opens along horizontal tracks that run back into the garage. It is available in single or double door sizes up to 5000 mm wide.

1 Two-point locking for security

2 Pivot arms and triple spring system

3 Guide rails and roller assembly

4 Secure parking position

Retractable Plus lifting gear has specially designed lifting arms for narrow openings, which allow for maximum use of the clear passage.

Steel panel doors

Ribbed door designs have a classical appearance and blend in with most homes. Our wide-profiled doors are precision-engineered for durability and perfectly complement modern architectural design. Their tough and sturdy construction offers resilience against the elements and a design that will stand the test of time.

GRP panel doors

Our GRP panel doors are available in either a timber effect or gloss white finish. The timber effect designs have a woodgrain surface finish that imitates the texture of real wood, but unlike real wood it does not need to be treated or stained and is therefore low-maintenance.

Kenmore

Kenmore with windows

Glastonbury

Somerset

Penshurst

Swinton

The Arden and Stamford are only available in gloss white, utilising a UV protective gel coating developed for the marine industry to prevent door discolouration overtime. Thus the door will maintain its stunning white appearance for many years to come.

Arden

Arden with windows

Stamford

Stamford with imitation window

Timber panel doors

Choose from either Solid Cedar or Elizabethan style timber garage doors. Our Solid Cedar range is constructed from tongue and groove solid cedar boards that are held together with wooden dowel rods and a partial WBP plywood backing. Whilst our Elizabethan range is built using beautifully machined Western Red cedar and Okoume marine grade plywood backing. Full range of handle and stain options available.

Vertical Cedar

Horizontal Cedar

Sandhurst

Hampton

Countryman

Chevron Cedar

Barrington

Kingsbury

Ashton

Vertical and horizontal cedar doors are constructed using 83mm boards, whilst the Hampton and Countryman use 133 mm boards. A 5.5 mm thick partial plywood backing is applied to all solid cedar garage doors.

Whilst Cedar is a softwood, it contains natural oils that act as preservatives to help the wood resist insect attack and decay. These naturally self-protective qualities help it to withstand high-moisture areas without warping, cracking or rotting. It also means that the Cedar wood remains straight and flat, making it perfect for Garador doors. When properly finished and regularly maintained, Western Red Cedar will last for many years to come.

Tudor

Bosworth

Hinton

Grantham

All timber doors are built within a steel boundary chassis for added strength and the chassis itself is painted in Terra Brown (RAL 8028) as standard.

Additional options

Quick-fit steel frame

A steel frame provides a faster, more accurate way of fitting your Garador up & over garage door, as the frame is constructed to fit the size of your door perfectly. Furthermore, because the frame is constructed from galvanised steel it will last for many years to come, unlike a timber frame which may warp or rot over time.

Upgrade to Secured by Design

All SBD up & over doors come supplied with a galvanised steel frame as standard, which is quick and easy to fit and provides added structural strength and stability to the door and the opening.

1 Improved Lock Security

Additional steel plates have been added to the base corners of the door to protect the bottom locking system.

2 Lock Body Protection and Anti-Snap Cylinder

A reinforcing plate has been added to the lock body to prevent attacks against the locking mechanism.

3 High Security Bracing

There are now at least eight door braces rather than two at the back of the door for extra protection.

Introducing the Garador side-hinged garage door

Garador's side-hinged garage doors have been engineered with an intuitively simple and easy-to-use design. They are ideal for garages where frequent access is required to store and retrieve larger items such as bicycles or garden tools. A lever handle is used to operate the door and both door leafs open outwards providing clear and unrestricted space within the garage.

Choose from an extensive selection of standard and made-to-measure door sizes. Three different materials are on offer to suit your garage's individual requirements, these are: steel, timber or grp (glass reinforced polyester). Each material comes in a variety of designs and colours to suit. We also offer a range of matching garage side doors.

Modern appearance, classic steel design

Our steel side-hinged garage doors have a classic appearance that blends in with most homes. Choose from a range of traditional Georgian designs and more modern swage or wide profiled models.

Robust and reliable performance

Our side-hinged garage doors have been designed to provide years of reliable use and excellent security. A 75 mm wide galvanised steel door frame gives a strong and stable door construction. The hinges are concealed in the frame reducing their vulnerability to burglars and providing a seamless appearance across the surface of the door, as there are no hinge knuckles protruding.

1 Two-point locking for security

2 Door stays and dampeners

3 Sturdy weatherproof rubber seals all round

4 Aluminium threshold

3-way adjustable hinges allow the door position to be precisely adjusted for a smooth door action and a tight close against the rubber seal.

Secure and thermally insulated sectional garage doors

Garador sectional garage doors are made up of separate sections that vertically lift and then run on tracks back into the garage. This allows for closer parking to the garage door as there is no "swing out". The door has Premium 42 mm thick insulated sections that are ideal for integral garages.

Four different door designs, six surface textures and a selection of RAL colours, mean there are an extensive range of door combinations, to suit homes with either modern or traditional architecture. Please see over leaf for further details.

All Garador sectional garage doors come with a Limited 10 Year Warranty

Georgian and Linear designs

Excellent insulation and thermal performance

Our Premium sectional garage doors provide great thermal insulation, which is perfect for integral garages. Each door section is 42 mm thick and filled with CFC-free PU rigid foam. This is encased by a steel skin on both sides of the panel, for a strong and stable construction, and a seal between each section to prevent drafts.

Excellent security with anti-lift kit

For Garador automated sectional garage doors, the anti-lift kit in the operator's boom stop, prevents forced opening from unwanted intruders. GaraMatic operator is required. Furthermore, any Garador premium sectional garage door that is fitted behind the opening and automated with a GaraMatic operator can be accredited with Secured by Design status.

Please note, the door must be unmodified and registered with Garador to qualify for Secured by Design accreditation.

Full drive-through width

The design of Garador's sectional garage door allows you to maximize drive-through width, as there are no lifting arms taking up precious space, as is the case with a traditional up & over garage door. This makes it much easier to park larger modern vehicles such as 4 x 4 s in your garage.

Matching appearance of frame and door leaf

The colour and surface texture of Garador's sectional door frame and leaf are perfectly harmonised for a uniform appearance. Top fascia panel and frame cover profiles are supplied in white woodgrain surface finish as standard, colour match available as an option for coloured doors.

Expert engineering, designed for everyday use

Our sectional garage doors are expertly engineered for everyday use, with a range of features that ensure outstanding thermal performance, security, safety and longevity.

It's important to factor in how much headroom you have inside the garage, as this could affect the type of garage door you can fit. Our sectional garage doors with tension or torsion (low headroom) lifting gear, require just 100mm minimum headroom.

BS EN 13241 Compliant
All Garador garage doors comply with the latest European safety standards.

Expert engineering

Enhanced insulation with ThermoFrame
Garador's ThermoFrame provides up to 15% improved thermal insulation. The plastic profile, that's fitted to the door frame, creates a thermal break between the frame and brickwork. Extra rubber seals on both sides of the door and on the top door section, contribute to a better overall seal.

Durable paint finish
A durable powder-coat paint finish ensures the surface of your door is protected for the long-term. Choose from a selection of surface textures on page 34.

Flush fitting panels
A flush-fitting fascia panel is the most elegant solution for an invisible transition between the panel and door leaf. When the door is closed, the top door section is flush with the panel. Please note, intermediate seals only on 42 mm Premium insulated sectional doors.

Floor seal
A large bottom weather seal accommodates any slight inconsistencies in the surface of your floor, creating a tight seal and preventing drafts.

Outer edge and intermediate seals
Flexible and weather resistant seals on all four sides of the door help to keep the wind and rain outside. Intermediate seals between every section joint, further enhance the door's thermal insulation.

Plastic frame footer
A plastic protective cover is fitted to the base of both sectional door frame legs. This provides long-term protection against corrosion that might be caused by humid acids or salts, in a part of the door that is susceptible to rust.

Safety features

Side hand guard
The side tracks are completely enclosed, from top to bottom, so there are no gaps between the door leaf and the frame where fingers could get trapped.

Anti-drop safety device
Garador sectional doors with either tension or torsion lifting gear, have an integrated anti-drop safety device. These systems prevent the door from crashing down in the event of a spring or cable failure.

Pinch protection
Each of the door sections have been designed specifically to prevent finger trapping. Each section rebate is optimally shaped as a finger protection profile that is effective both between the door section and on the hinges.

Safe door travel
The combination of adjustable rollers, solid rollerbrackets and safety tracks, prevents the door sections from derailing.

HCP interface to connect accessories or external SmartHome systems (i.e. Apple HomeKit)		•	•

Bi-directional radio technology

Our operators use bi-directional FM radio signals, that have the same 128-bit encryption used by banks for online security. This technology makes the electric operator even more secure and ensures a more reliable signal and extended range.

GaraMatic 9
peak force 750 N
incl. two 4-button hand transmitters

GaraMatic 10
peak force 800 N
incl. two 4-button hand transmitters

Integrated bluetooth receiver as standard

GaraMatic 20
peak force 1000 N
incl. two 4-button hand transmitters

Integrated bluetooth receiver as standard

Engineered for security and convenience

1 Mechanical lock inside boom for security. As soon as the garage door is closed, the anti-lift kit automatically engages in the operator's boom stop, preventing any forced entry. This is a mechanical process which functions without the need for a power supply.

2 Emergency release from inside. The pull handle provide an emergency release, so the door can be conveniently opened from the inside in the event of a power failure.

3 Maintenance-free tooth belt. Unlike operators with a chain or spindle design, Garador's kevlar toothed belt does not require grease or lubricants and is therefore maintenance free. The belt is reinforced with aramid fibres, so it is tear resistant and quiet.

LED Lighting for energy efficiency
GaraMatic operators feature an integral LED light for energy efficiency. Furthermore, each model has a low power consumption of less than 1 watt in stand-by mode.

Third ventilation opening position
In addition to the half-open ventilation position, our GaraMatic operators also have a one-third ventilation position. This feature is only activated with the use of the climate sensor.

Easy to connect
A larger and more accessible connection compartment on the back of the operator, makes the integrated circuit board easier to access when connecting accessories or smarhome systems.

Control your garage door with your smartphone

We use our smartphones everyday to talk, type messages and browse the internet. With Garador's new BlueSecur app, you can quickly and conveniently operate your garage door using your smartphone too. An integrated bluetooth receiver provides a secure, reliable connection. The bluetooth receiver can be turned on or off.

Our range of genuine GaraMatic operator accessories, such as hand transmitters, code switches and wall consoles, are still available for a more traditional control device.

Garador BlueSecur App

- Control your GaraMatic operator (open/ close/ open partially/ light) from your smartohone.
- Quick and easy-to-use interface.
- Push notifications when receivers come into range.
- Free download from App store or Google Play.
- One free user key included. Others available via in-app purchase.

Automatic safety reversal

For your safety, all GaraMatic operators comply with the latest European safety standards (BS EN 13241). They have an automatic safety reversal feature, which uses force limitation, to recognise when there is an obstruction in the path of the door, at which point the door will stop and reverse allowing the obstruction to be removed.

Check the position of your garage door

All GaraMatic operators have a remote status query feature*, so you no longer have to go outdoors in all kinds of weather to check that your garage door is closed. Simply press the button on your hand transmitter and the colour LED will indicate the door position.

* 5-button bi-directional hand transmitter required

Display of 5-button hand transmitter
1 Door is open
2 Door is closed

GaraMatic operator accessories

5 button Bi-directional hand transmitter

4 Control buttons, plus a status function. Available in matt black texture, high-gloss black or white.

The 5 button hand transmitter comes with a remote status query feature so you can check whether your garage door is closed at the press of a button.

2 button Bi-directional hand transmitter

Features 2 control buttons and an eyelet for a key ring. Available in high-gloss black or white, green and wood effect.

4 button Bi-directional hand transmitter

4 Control Buttons. Available in matt black texture with chrome or black end caps.

Features 4 control buttons and an eyelet for a key ring. The 4 button hand transmitter can be programmed to open up to four garage doors.

1 or 4 button Bi-directional hand transmitter

1 or 4 Control Buttons. Available in high-gloss black.

The 1 button hand transmitter combines convenience and style with the simplicity of a single button to operate your garage door.

The 4 button hand transmitter can be programmed to open up to four garage doors.

Hand transmitter station

Available in high-gloss black and white.

The hand transmitter station provides a handy and stable solution for storing your 5 button, 4 button or 1 button remote hand transmitter when it is not in use.

Robust 3-button hand transmitter

Robust and weather resistant design with 3 control buttons. Available in black.

Rubber coated surface with 3 large buttons. Easy to operate, even when wearing gloves after gardening or riding a bicycle. Features eyelet, lanyard and belt clip so its there when you need it.

Wired wall console IT3 B

3 functions
Supplied with 7 metre connecting lead (2 wires)

Button for opening and closing garage door. Plus additional buttons for light (on/ off) and operator (on/off). Painted in Pure White (RAL 9010).

Wireless wall console FIT 2 BS

3 button functions

Two push buttons for controlling up to 2 garage doors, via radio signal. One additional button for on/off function of connected external elements. Painted in Pure White (RAL 9010).

Internal push button IT 1b-1

Large, illuminated button for convenient opening of the door.

Plastic housing in Pure white (RAL 9010).

Space saving and convenient roller garage door designs

Garador roller garage doors open vertically and roll into a compact box at the head of the garage door opening, requiring minimal space inside the garage. This space-saving design means you can make full use of the space inside your garage, as the ceiling area remains free and can be used for lighting or additional storage space.

Choose from two different models, the GaraRoll and the GaraGlide. The GaraRoll is our premium offering, with a chain driven motor and pressure sensitivity built-in, whilst the GaraGlide utilises a tubular motor and optical-sensor at a significant price advantage.

All GaraRoll and GaraGlide roller garage doors come with a Limited 10 Year Warranty.

GaraGlide

The GaraGlide is electrically automated, with a tubular motor positioned at the end of the barrel, inside the box cover. It is equipped with a mechanically adjustable end-of-travel position, to set the doors open and close parameters. Supplied with crank handle for emergency release in case of power failure. Comes with two 2-button standard hand transmitters.

Control panel with integral LED light

Full box cover as standard

Mechanical stop for security

Manual limit setting

Rubber floor seal and brush seals in guide rails

Wired optical sensor for safety

GaraRoll

The GaraRoll is electrically automated with a chain driven operator and unique spring balanced system, minimising strain on the motor and ensuring a long service life. As the operator incorporates force limitation technology (pressure sensitivity), it automatically recognises obstructions and safely reverses, making an additional closing edge safety device unnecessary. Comes with two 4-button bisecur hand transmitters, for enhanced security and signal range.

Control panel with integral LED light

Full box cover as standard

Pull cord emergency release in case of power cut

Spring assisted for safety and longevity

Rubber floor seal and brush seals in guide rails

Mechanical stop for security

Automatic safety reversal

DuraBelt anti-scratch system

Additional options

Additional fascia panel

External emergency release

GaraGlide

- Wireless optical sensor (batteries required).
- Upgrade to bisecur radio technology (retrofitting unavailable).
- Additional fascia panel. Used to stabilise main fascia panel, always required when fitting between opening.
- External emergency release (open the door using crank handle from outside).
- An electronic limit setting is programmed through the control panel for quick setup.

Upgrade to bisecur radio technology

Electronic limit setting

Wireless optical sensor (batteries required)

GaraRoll

- Additional fascia panel. Used to stabilise main fascia panel, always required when fitting between opening.
- Emergency battery. Emergency power for up to 18 hours/ max. 5 door cycles.
- Chamfered bottom profile. For angled floor surfaces, supplied in Jet Black (RAL 9005).
- Option of manual operation. Manually operate door by hand, without need for hand crank.
- Exterior door release. Recommended when there is no second entrance to your garage.
- Audible intrusion alarm. Alarm with 110db sound, for security and peace of mind.

FrontGuard entrance doors Thermally efficient and secure

Our FrontGuard entrance doors offer exceptional thermal insulation and security. This is achieved through a heavily insulated door panel, thermal breaks built into the frame and rubber seals on both the door leaf and frame. As well as 5-point locking as standard and 3 additional security bolts on the hinges, making it practically impossible to force the door open.

The Garador FrontGuard range is comprised of three different collections:

- Modern.
- Contemporary.
- Classic.

The wide range of designs, colours and glazing options allow you to create a door that perfectly matches your property. We also offer a range of FrontGuard doors to perfectly match a garage door from the current Garador range.

Choose from two variations of FrontGuard door

Choose from two variations of entrance door, FrontGuard 46 or FrontGuard 65. Our FrontGuard 46 doors provide excellent thermal performance with a 46mm thick PU-foam filled door panel and FrontGuard 65 has a further enhanced door design at 65mm thick.

FrontGuard 46

FrontGuard 65

1 PU foam filled door leaf with thermal break.

2 60mm aluminium frame (FrontGuard 46) or 80mm aluminium frame (FrontGuard 65). Both with built in thermal break.

3 Fully adjustable 3-way hinges.

4 5 point security locking.

5 Stainless steel internal handle.

6 20mm plastic and aluminium threshold, with rubber seals.

Modern designs

Our modern design FrontGuard doors have a superb high gloss surface finish. A flush fitting appearance on the interior and exterior, as well as a stainless steel glazing frame, underscore the door's elegant look.

Break in resistance

The FGS 700 / 900 / 010 / 015 and 100 FrontGuard door models come optionally without side elements and transom lights with RC2 equipment. The FrontGuard 65 range, including those with side elements and transom lights, are available with RC2 equipment as an option. The doors are also approved for fitting either opening inwards or outwards of the opening.

Classic designs

With their traditional appearance, our Classic design FrontGuard doors complement both modern and more traditional architecture. The profile style, with its composite glazing frame, perfectly blends in with the classic panel look.

Consider the position of your entrance door. If it leads into a hallway which lacks natural light, a glazed door model might be preferable. But if you live in a busy urban street, a door without windows gives you more privacy.

* Only available in White (RAL 9016)
